Strategies for Preventing and Responding to Cases of Child Sexual Abuse

Prof Freda Briggs AO, Emeritus Professor in Child Development, University of South Australia

In this presentation, Freda highlights the scale of child sexual abuse, what is known about offenders, and strategies for prevention that can help children stay safe. She will also discuss the short and long term effects of abuse, how young children communicate trauma, as well as how to recognise and appropriately respond to cases of child sexual abuse.

Can Changing Your Brain Change Your Life? Neuroplasticity and Success

Barbara Arrowsmith Young, Author, Psychologist, Learning Disorders Expert, Director, Arrowsmith School and Program

Barbara will examine the social, educational, mental health and economic costs for students with specific learning disabilities and how a cognitive program that drives neuroplastic change can address these difficulties. She will discuss how different cognitive functions impact learning and academic skill acquisition and how cognitive exercise can be used to overcome specific learning difficulties and unlock student potential.

Technology and Education – Is it Any Better? What's the Evidence?

Assoc Prof Michael Nagel, Teacher and Researcher, University of Sunshine Coast

Technology has infiltrated all aspects of life and schools market themselves on having the latest 'i' something or laptops for all. Despite the positives, there is growing evidence that it may not be adding as much to our children's education as we would like to think. This presentation looks at the use of technology in schools with a focus on learning and the evidence suggesting that technology is not the panacea for improved pedagogy, higher achievement and scholastic success that it is often purported to be.

What No One Tells About Boys

Maggie Hamilton, Author and Social Researcher

As boys' issues around communication, underperformance, and related concerns intensify, how can we empower them and help them to be fully engaged in life? How do we balance the ongoing need to respect girls, with the lack of direction and silent emasculation many boys display? How do boys experience school, parental separation, drinking and drugs, and early sexual encounters? How helpful are the solutions offered by pop culture, and how can we plug the gaps?

Willpower, Impulse Control and Success in Life

Andrew Fuller, Child and Adolescent Clinical Psychologist, Inyahead

The ability to exercise restraint and delay gratification is a powerful predictor of success in life. In this insightful presentation, Andrew will discuss strategies to develop willpower and impulse control in children and thus better position them to lead successful lives.

Positive Psychology Strategies to Reduce Depression in Adolescents

Dr Justin Coulson, Author

Have you ever had a rock in your shoe? Remember how it absorbed your focus and distracted you from everything happening around you? Depression can be like that. This highly interactive, engaging presentation examines how four easy-to-apply empirically validated positive psychology strategies can reduce depression in teens and help them (and the adults who care about them) lead fulfilling, happy lives.

Cultivating Self-Esteem Rather than Ego

Dan Haesler, Teacher, Writer, Consultant

In order to nurture self-esteem, today's kids are growing up being told that they are special and that everyone gets a prize. On the surface, this might not seem like such a bad thing, but somewhere along the way, we've lost perspective. Dan will dispel common happiness myths, and show us how to set our kids up for success – the right way.

Adolescent Brain Development

Judy Bailey, Writer and Broadcaster

The teen brain is often likened to a bright shiny Ferrari with no brakes. It operates on a different level and we now know that the pre-frontal cortex is not yet fully functioning at this time, explaining a lot of teen behaviour. This session explores the latest research in neuroscience about adolescent brain development and the changes affecting young people during this time.

Further Topic to be Advised

Speaker to be announced
